EDUCATION

RMIT Vietnam University

Bachelor of Software Engineering (Honours)

Oct 2020 – Apr 2025

GPA: 3.5/4.0

Relevant coursework:

- Objected-Oriented Programming
- Database Application
- Machine Learning

RMIT Vietnam University

Master of Artificial Intelligence

Oct 2025 – Now

Relevant coursework:

- Practical Data Science

EXPERIENCE

Backend Developer | VMO Holdings, Hanoi, Vietnam

Oct 2024 – Jun 2025

- Developed and optimized APIs, managing data schemas.
- Improve system performance.

PROJECTS

Web Recommendation Engine

Jan 2026

Developed a dual-engine system using the Anonymous Microsoft Web dataset to predict user preferences and improve content discovery. The project involved a full data pipeline, including clustering user behaviors and building supervised models to predict engagement metrics.

- Technology used: Python
- Libraries used: Numpy, Pandas, Matplotlib, Scikit-learn

Hybrid E-commerce Database

Sep 2023

Designed and implemented a hybrid Relational and NoSQL system to support complex inventory management and diverse user roles. Conducted performance analysis using indexing and concurrency techniques to optimize query execution and ensure data consistency.

- Technology used: JavaScript
- Database: MySQL, MongoDB

Furniture Image Classifier

May 2024

Performed exploratory data analysis and pre-processing on a large-scale dataset of 90,000+ image samples. Built a CNN architecture to automate product categorization and ensured data integrity across high-volume datasets.

- Technology used: Python
- Libraries used: Numpy, Pandas, Matplotlib, Scikit-learn, Keras

SKILLS

Languages: Python

Database: MySQL, PostgreSQL, SQLite, MongoDB
